

CLASS –X

Biology

Date:-20/04/2020

Study from the video uploaded (part-3) Chapter:- "Life processes" and then write the answer of these questions in your notebook.

1. How are the life processes inter-related?
2. Again revise the major four life processes i.e. *Nutrition*
Respiration
Transportation &
Excretion.

Tally your answer here:
(Questions given on 15/04/2020)

1. The control and coordination in human beings takes place through nervous system and hormonal system .

Coordination:- The working together of various organs of the body of an organism in a proper manner to produce appropriate reaction to a stimulus is called coordination.

2. Definition:-

- **Reproduction:-** The process by which a living organism is able to produce more of its own kind.
- **Movement:-** Change in position of an organism or any of its body part on its own is called movement.

3. The main difference between growth and development in biology is that growth is the increase in size and mass of a particular organism over a period of time whereas development is the overall changes in the whole organism in terms of organization and function.
