

CLASS –X

Physics

Date:-17/04/2020

- Watch the video of Science Chapter-12 (Electricity), Part-3 from **Optimum Online E-Learning Platform**
- Write down these definitions in your fair notebook

Charge: It is the intrinsic property of some fundamental particles, like electron, proton

Electric Current: The rate of flow of charge through a conductor is called electric current

Potential: The amount of work done to bring a unit positive charge from infinity to a point is called the potential of that point

Potential difference: The amount of work done to move a unit positive charge from one point to another point is called the potential difference between those two points.

Ammeter: It is a device used to measure electric current

Voltmeter: It is a device used to measure potential difference between two points in an electric circuit
